

Sai Sanjusha Vinnakota

Frontend-Developer

As a Front-End Developer, I have worked on numerous projects, including development of the Sri Prabhupada Lila website for Bangalore ISKCON and creating a website for a US-based motel. My work involves creating dynamic and responsive web applications using the latest technologies like React.js. With a focus on user-friendly design and performance optimization, I collaborate closely with clients to meet their unique needs and ensure high-quality results.

Bangalore

Achievements/Tasks

- Received recognition for remarkable contribution to the UI interface design project for motels in the US. Designed intuitive and visually appealing interfaces that significantly improved user experience and increased online bookings.

PROJECTS

1:Web Design for ISKCON Bangalore - Srila Prabhupada Tribute

- Designed and developed a dedicated web page for ISKCON Bangalore to honor Srila Prabhupada, the founder-acharya of ISKCON. The project involved creating an engaging user interface that showcases his life, teachings, and contributions to the Hare Krishna movement. Implemented responsive design to ensure accessibility across various devices.

2.UI Interface Design for US Motels

- Migrating production and test webstack environment in On-premises on SAP Hybris Platform with all dependency application stack to AWS Cloud with full automation. We have created automation framework to deploy AWS Infrastructure and to execute load test using Jenkins, Terraform used for the infrastructure as service and ansible for deployments

3.E-Commerce Websites

- Created Netflix ,BookMyShow and other e-commerce websites
